

THEME

We have three categories of problem.

HEALTH

- Touchless experiences in hospitals with a system to meet people from wherever they are.

Examples

- You can build an app or web application.

Tech Stack

- There are no such restrictions

Education

- Create a progressive web app which can make virtual classes more interactive.
- Virtual light weight Class attendance app/web.

Examples

- you can build an app or web application.

Tech Stack

- There are no such restrictions

Entertainment

- Engage with folks from the community by building a real time live streaming hack.
- Build an engaging game with real time chat & voice feature.

Examples

- you can build an app or web application.

Tech Stack

- There are no such restrictions

Others

- Make a video/Audio/chat App/web application using Agora SDKs.
